Shipping Weight: 6.4 ounces (View shipping rates and policies)

Average Customer Review: 5.0 out of 5 stars 9 customer reviews

Best Sellers Rank: #68,006 in Books (See Top 100 in Books) #43 in [Books > Children's Books > Education & Reference > Science Studies > Astronomy & Space > Aeronautics & Space](#) #60 in [Books > Children's Books > Education & Reference > Science Studies > Astronomy & Space > Astronomy](#) #1222 in [Books > Children's Books > Science, Nature & How It Works](#)

Age Range: 4 - 7 years

Grade Level: Preschool - 2

Customer Reviews

PreS-Gr 2 **•** In this lively, colorful introduction to the solar system, a jaunty text follows a spaceship filled with a diverse group of kids as it blasts off into the Milky Way, through the galaxy, past the sun, and at last to Earth. Full-color, childlike drawings will keep browsers turning the pages even without listening to the CD included. The repeating lines of the verse imprint the information and the catchy refrain, "Where the bright stars shine/all around, all around,/Where the bright stars shines all around" will ensure participation. Lingering very briefly on Earth to give a musical shout-out to the blue water that supports its terrestrial life, the rocket keeps going to an asteroid belt, Jupiter's moons, the stars, and beyond. There isn't a lot of science here, but this picture book is loads of fun to browse, and readers will enjoy singing along with the CD in a group or alone. Back matter includes a few factual details about our galaxy, satellites, shooting stars, and asteroids, as well as a spread about the International Space Station and the future of space exploration. **•** Frances E. Millhouser, formerly at Fairfax County Public Library, VA --This text refers to the School & Library Binding edition.

Sunny Scribens grew up in Nashville, Tennessee - known as the 'Music City'. She has been writing for as long as she can remember, but this is her first foray into songwriting. Sunny now lives in Massachusetts with her family.

Great book! The book comes with an audio CD and also a short animation. The book can be read or sung to the melody of "Green Grass Grew All Around". The animation is exactly as shown on the book. My child and preschool friends loved hearing the singing version while following the book as well as watching the animation. The last couple of pages of the book provides "real facts" on the universe. Great addition to our home library! And we just found out our local library will also add this book to the collection.

Cute book. My preschoolers are mesmerized by it!

Got for my special ed preschool class. They love it!

My kids in my classroom LOVE THIS BOOK!!! They are aged 2-3. I read it about 4-5 times a week! Grabs their attention every time and it never gets boring for them. The other teachers are always borrowing it from me as well.

Fun for my Kindergarteners!

Great children's book, particularly for those enamored with outer space.

Best book and song ever!

Love Barefoot sing alongs!
