# Build The Perfect Bug Out Survival Skills: Your Guide To Emergency Wilderness Survival

## Synopsis

LEARN HOW TO SURVIVE! When it comes to surviving a disaster, having survival skills and know-how is as essential as having the necessary survival gear. Without the right knowledge, survival gear is useless. "Build the Perfect Bug Out Survival Skills" will teach you the essential wilderness survival skills you need to endure a bug out situation or prolonged off-grid scenario. You will learn how to meet the four core survival needs shelter, fire, water and food with a minimum amount of equipment. Detailed photos and step-by-step instructions will help you master each skill. **FEATURING:** Detailed instructions for survival skills that require little gear an emphasis on primitive tools Step-by-step photos that clearly illustrate complex techniques like knot tying, shelter construction, fire building and setting snares and traps Advanced knowledge that could save you and your family during a real emergency"

## Customer Reviews

Creek Stewart is the author of Build the Perfect Bug Out Bag, The Unofficial Hunger Games Wilderness Survival Guide, Build the Perfect Bug Out Vehicle, and Build the Perfect Bug Out Survival Skills. Creek regularly publishes articles relating to disaster preparedness in numerous magazines. He owns and is Lead Instructor at Willow Haven Outdoor--a survival, preparedness and bushcraft school located in central Indiana. Creek specializes in disaster preparedness and has consulted with individuals, corporations, non-profits and government agencies all over the United States about a myriad of preparedness-related subjects, projects and initiatives. He has been featured on Fox & Friends and is host of Fat Guys in the Woods on the Weather Channel.

Just got the new book in the 'Build the Perfect Bug Out' series by Creek Stewart. As soon as I saw this on 's pre-order, I knew it was a must have. Even though I have stuff by Jeager, Nesmuk, Kochanski, and Canterbury as well as numerous tomes on country and pioneer living, this is one I had to have. Let's be honest; much in survival and preparation books is redundant, as you can talk about how to boil water only so many different ways, But Creek has proven time and time again that a flexible mind is the most important survival skill. In his new book Build the Perfect Bug Out Survival Skills, he blends urban and wilderness skills in such a clever and new way, it makes the book immediately valuable for the urban reader. For instance, he has a great idea for using a 55 gal drum as a fire reflector. Often times, you can find a drum torn up or in bad shape. Take that one and split down the side and stretched out a bit so it forms a wide letter 'C'. Then lay it on its side and build the fire right on the edge. Also, his idea for a rat snare using a twitch up and 4 inch pvc is absolutely the most shrewd trapping scheme I've seen in months. He also shows how to make an urban alarm on a door using a twitch up as well...brilliant! Look, you need this book. Even if you're not in the woods, even if you're not a 'prepper', even if you just sit around all day waiting for the government to protect your family and take care of your family because you won't do the job God gave YOU....you need this book. And why? Because, if for no other reason, you need to see really sagacious ideas contrived to solve problems you didn't even know you had and might actually one day have to implement. Well, his next book won't be in the 'Bug Out' series. It will be a stand alone volume entitled "The Noncon Pack". A term that Creek coined which means 'non-consumables'. This volume will deal with building a bag for the truly screwed, because you're not going to be back...ever. So, everything in that bag must allow you to make what you need not be what you need. That one may not even get to be printed but I really do think Creek's got the juice to make that deal even if he has to go vanity press and put it on

himself. <https://plus.google.com/102151734057726276427/posts/Q8cn1LsTw5S>

Just received this book today...have read about a fourth of it so far. What a great book. Contains a ton of actionable survival info. I have been studying / practicing survival skills for a while and was pleased to find a number of techniques, ideas and skills that were new to me. Highly recommend...wellworth the price. BTW...add Dave Canterbury's BUSHCRAFT 101 book for a one, two knockout punch to your acquired survival skills. This will give you plenty to work on if you put the information to practice.

The best build-your-bugout-kit book I've read! Specific items, specific list, but totally modifiable to the user's needs. Creek is unbiased yet thorough in his approach to preparing and using a bugout kit. This is a great evolution to the online primers I've read and segues into his BOV and survival hack books. Most of what he discussed can be picked up mostly anywhere but I also shop his online store to build my kit. My favorite thing about his book is his overall candor and willingness to help anyone build their own custom kit, including lists at the back of the book. Great reference I use every payday to build my kit. Thanks, Creek!

Creek does a really good job of presenting specific advice on an infinity broad subject. He has so many "take-home" points I finished the book feeling more informed and more confident. I'm glad I read it.

Review of Build the Perfect Bug out Survival Skills Creek Stewart's "Build the Perfect Bug Out Survival Skills: Your Guide to Emergency Wilderness Survival" by Creek Stewart, owner and lead instructor of WillowHavenOutdoor in Indiana, is an outstanding book on survival skills. Creek does not pull punches, but lets the reader know that surviving outdoor wilderness, while possible, is not at all easy. In the process Creek lays out an outstanding outline of how to survive in the outdoors using what ever may come to hand, be that garbage pile accessories or tree branch and vines. Creek also gives some unusual, but very accurate advice in regards to water, wild animals (big and small) and eating wild plants. Creek is truly an expert on outdoor skills. His writing displays a deep understanding of the outdoors and the necessary skills to survive out there. Creek's section on fire starting and fire lays in truly one of the best I have ever read. He speaks of the difficulties in fire lighting, while giving easier ways to be prepared for that task (e.g. Fresnel lens in wallet). The discussion of the progressions from glowing ember through tinder, small sticks, squaw wood and real branches is excellent. The book is well laid out, even in the Kindle Version I have. The writing is clear and well done. I recommend this book to anyone expecting to bug out, or even just interested in outdoor survival. I have gone so far as to order three more of Creek's books and already have read Creek's first attempt at teaching stories "Stuck" (see my review here on ). This is by far one of the very best books on outdoor survival out there. Even if you are not expecting calamity and societal collapse, which philosophy is not here espoused, but use survival as a hobby, this is an excellent book choice.

I bought this for me and it is full of relevant information that is great for beginners or long-time preppers. I loved it so much I bought it for my nephew as well as a Christmas gift. I think he'd agree with my review as well :)

I have purchased through three of Creek Stewart's books and find each of the three the best of the best. Beautifully organized and illustrated with appropriate photographs, the books contain on line illustrations of many of the knots and processes, and appropriately on line cites, these books are very simply, the best of the best.
