Multiple Choice Questions On Statistics And Probability With Supporting Mathematics (With Solutions)

Synopsis

There are five topics covered under Statistics and Probability and these are: 1. Basic Statistics 2. Probability 3. Probability Distributions of Random Variables 4. Correlation and Regression Analysis 5. Statistical Inference. It also covers following three topics of Supporting Mathematics: 1. Numerical Methods 2. Algebra 3. Calculus. This eBook gives you round about 300 Multiple Choice Questions on the above-mentioned topics. These questions are meant for practicing and/or for preparing various competitive examinations, which may be held either online mode or paper and pencil mode. One can read the questions on his/her kindle/ipad/tablet/iphone/ Computer etc. and solve as usual with paper and pencil using the authorized calculator and note down the answers after solving the same. If for an examination the use of the prescribed formulae book is allowed, the same also can be used. The answer has also been given along with its detailed solution in the eBook for each and every practice question. Even if the answer is correct, one should definitely see the solution provided for confirmation of the various concepts and for better understanding of the theory. The solutions are further training in the material one is supposed to know for various examinations. Questions have been classified topic wise and the syllabus of each topic has been adopted as per some competitive examinations. The study solutions do give you a guide to solve each topic of Statistics and Probability. The solutions do give the formulae used to solve the problems. Basic mathematics questions have been chosen in order to support a student of Statistics and Probability for better preparing himself/herself the subject.
