Customer Reviews

Book by Kathryn Falk, Edleycoe Griek

I build dollhouses from kits. I have built three and have four more kits to go. I bought this book with the idea that I might build one from scratch. For me, that answer is no. It is less expensive and less time-consuming to build one from a kit. Previously, I built model wood ships, compared to that, building a dollhouse is a simple joy. But if you have no experience building in wood on a miniature scale I must caution you that 95 per cent or higher, never get completed. My advice to anyone is to build from a kit first. If after you complete that, you still want to scratch build a dollhouse then I heartily recommend this book! I had a hard time rating this book. It is a one star for a novice and five stars for an experienced builder, so I chose the middle ground and rated it three stars.

Never know what you're going to get. I was hoping for more plans and sourcing of miniature furniture. It'll do.

This is a good starting point for anybody who wants to build dollhouses. The projects are useful and the directions are very clear.

great and good experience. i love it so much, Now that's a product....This is a solid piece of steel...

Much more than I expected.... Received as described. so fast, receive it next day ,

This is a great book. Many styles. I have been building dollhouses for 30 years.
