How To Install Artificial Grass - The Average Joe's Step By Step Guide That Makes For An Easy Installation

Synopsis

Get ready to SLASH your water bill by 70%! No more Saturdays WASTED mowing and weed-whacking your lawn. Follow my guide and you WILL have the best looking lawn on the block! My EASY step-by-step guide will show you that anyone can do this for a fraction of the price and in the span of a few short hours. I'm just an "Average Joe" when it comes to home projects and I hate finding guides online for projects like these that: are very vague, are not "to the point" and have 100 pages of filler for every 10 pages of information. I'm sick of it! I wrote everything into a quick guide to help people on who don't want to waste tons of time reading guides. In my guide I: Keep this short and to the point Go over EXACT the Materials you'll need to get the job done Cover Curbing or Outline Containment Talk about Building a solid foundation Cover Prepping the area where the grass will go Share Secrets on Where to find the best deals on synthetic grass Tell You How to get the grass from the manufacturer or seller to your point of installation Tell You How to get the grass from the truck to your designated area Explain Laying the grass out along the designated area CRUCIAL: Making a rough cut CRUCIAL: Making an exact cut How to Pin the grass to the ground SAFETY HAZARD (MOST WON'T TELL YOU THIS): Adding silica sand to the grass for weight Tell you how to Make the grass look real My lawn looks so PICTURE-PERFECT that all the neighbors on the block wanted me to teach them how to install it. I work full-time and don't have time to help each individual one so I wrote a little blue print. My blue print was a HIT! They all said that this "blue-print" was so simple to follow that anyone could do it regardless of skill or background. So here I am, offering this quick guide to the masses on the net. I really want this guide to help you installing your dream lawn and making your yard the focus of conversation in the neighborhood. There are so many guides online that give you wrong information or seem to be mass produced by robots to where no one can understand what to do or what's going on. I'm not a writer, I'm just an "Average Joe" who wants to make this easy for anyone out there. "The perfect lawn is one easy step-by-step guide away!!!"
