Founded in 1915 as the Cartographic Group, the first division of National Geographic, National Geographic Maps has been responsible for illustrating the world around us through the art and science of mapmaking. Today, National Geographic Maps continues this mission by creating the world's best wall maps, recreation maps, atlases, and globes which inspire people to care about and explore their world.

Like all the official National Geographic Maps, this is wonderfully detailed and accurate, providing detailed information about hiking trails, remote campsites, etc. Northern Adirondacks on one side, Southern on the other. We were kayaking and hiking in and around Cranberry Lake, and this was with us at all times, and was always reliable. Because it is so detailed, it is quite large, so when using it during hiking or kayaking you need to pre-fold it to the area you will be in on a given day, but it is made of sturdy material that can take endless folding without harm. If you plan on visiting this area for camping, hiking, canoeing or kayaking, this map is highly recommended.

Big map, sturdy, can withstand the elements..

Took this map on our canoe adventure to little tupper. Map was the main navigational tool. Map is water resistant, and not at all flimsy.

A must have for hiking in the area! The trail book that goes with it is useful to have as well.

Exactly the map I was looking for!
