Founded in 1915 as the Cartographic Group, the first division of National Geographic, National Geographic Maps has been responsible for illustrating the world around us through the art and science of mapmaking. Today, National Geographic Maps continues this mission by creating the world's best wall maps, recreation maps, atlases, and globes which inspire people to care about and explore their world.

Like other National Geographic maps, this is a high quality material and interesting to look at. Unfortunately, this map did not make it out of my bag the entire trip. While Slovenia is a small country, it is too big to fit on one map. The map lacks enough details to be useful for both trails and roads. Save yourself the money and buy a road map in country and a trail map specific to where you want to hike.

Maps often tear at their folds when they get lots of use. I had high hopes for this one, and I wasn't disappointed.

Great!

This is a good map for getting a general overview of Slovenia, but it doesn't have the road details I needed for driving around the country. I should have waited until I got there, and bought a road map at a gas station.

Gorgeous rip proof map! thank you!

Nice overview map, made of durable paper. A bit heavy though because of the type of paper used. Pretty useful.

It shows every town and city. Clear and easy to read. Necessary if you are planning on traveling there. Excellent!

good map
