Customer Reviews

The Faber Accelerated books for Older learners are wonderful. The pace is fast enough to be interesting for someone like me, who listens to a lot of classical and jazz music. The song selections are pretty, sometimes even beautiful -- rare in a book for beginners.

My son's piano teacher is the one who selected this book. It is the only one my 9 year old is using, and after 7 weeks, my son was playing songs that I love to hear him play on the piano..... what more can I say then the combination of this piano book with a good teacher creates beautiful music.

I bought these for my grandchildren and for myself. It's a great way to learn, each lesson a new challenge and promotes good piano technique rather than just teach notes. I am now in process of purchasing the partner lessons - Technique and Artistry and Lesson books.

for my student

The first level was below my playing experience but I followed along anyway and it helped with my timing so I'm glad I did it. The format of the book is pretty nice. The page your on tells you which

page to play in the practice book which I thought was a really nice touch. Great format, easy to follow along with And interesting songs. I ordered the rest of the levels!

I couldn't remember a thing about music theory when I purchased my digital piano. I bought a few different music books but this was perfect. Took me through all the basics which I had forgotten. Easy to follow. The whole series is meant to be used with a piano teacher which is why I rated one of the other books a bit lower, but this still served its purpose.

I am taking piano lessons at 62 years old and my piano teacher told me to get this book. It is very easy to understand.

I like the Faber books for self study. Easy to follow with sufficient explanation.
