New Drugs: Bath Salts, Spice, Salvia, & Designer Drugs (Downside Of Drugs)

Synopsis

Some young adults think new drugs like spice, bath salts, or salvia are safe. In some cases, they're even legal. But what many young adults don't know is that these drugs are just as dangerous, if not more dangerous, than the illegal drugs that have been around for much longer. Some of these drugs are so new that no research has been done on how safe they are to take, so no one is even sure just how dangerous they really are. Discover the true risks of taking these new drugs. Read the scary real-life stories of people who've used these drugs and had to deal with awful consequences. Learn the downside of these new drugs!

Book Information

Series: Downside of Drugs

Library Binding: 48 pages

Publisher: Mason Crest (September 2014)

Language: English

ISBN-10: 1422230244

ISBN-13: 978-1422230244

Product Dimensions: 0.2 x 8.5 x 10.8 inches

Shipping Weight: 12.8 ounces (View shipping rates and policies)

Average Customer Review: 5.0 out of 5 stars 1 customer review

Age Range: 12 - 17 years

Grade Level: 7 - 12

Customer Reviews

Gr 6-8-Written with a Harvard Medical School consultant, this series discusses drugs in a tone that is appropriately sober yet not alarmist or condescending. The authors demonstrate empathy toward teens and the pressures they face. Many graphics seem macabre and over-the-top, such as an image of the Grim Reaper in ADHD Medication Abuse, whose unintentional humor belittles the serious message. However, many diagrams convey useful content, including a diagram in Dangerous Depressants and Sedatives that shows parts of the body affected by depressants and another one demonstrating how the chemicals impact the brain. Readers will absorb vast amounts of information through the text and the sidebars, which lend themselves to discussion and further

research. Despite some awkward moments, this series is mostly well written and expertly researched. Young readers-indeed, all readers-prefer compelling stories and dynamic design over didactic messages. In Weigl's "Let's Get Active" and Capstone's "Special Diets," colorful photographs of stunning outdoor scenes and fruits and vegetables make active, nutritious diets appealing. Scientific information about exercise's benefit to brain functioning and emotional health provide extra incentive to hit the gym, as we find in Mason Crest's "An Integrated Life of Fitness." Books that include content-packed charts and sidebars, and Common Core-inspired research questions, will provide the richest experience for readers-as we find with Mason Crest's "On My Plate." As the strongest in this collection shows, we are encouraged to take care of ourselves when provided with detailed, well-researched information in a lively manner. (c) Copyright 2014.
