Customer Reviews

MATT AND BETSY JABS write about do-it-yourself ideas to help you save money and live healthy, sustainable lifestyles. Visit them at diyNatural.com.

I read the reviews but wanted to give this book a try because I love the website. However, the reviews were right. The book is more of a handbook, it's about the size of a brochure book and all the recipes are what I get in the newsletters and online. Why buy the book for \$15 when you can get everything on the website for free? The book does have some space in the back to write your own

recipes and notes but I can go to a store and buy a notebook for \$1.00 for me to write notes in. I am very disappointed in this book and wish I could return it because it definitely is not what I thought it would be. Unless you just want the book and not look on the website, then this is for you. But if you are looking for actual recipes and want a good book, look elsewhere. Very, very, very disappointing.

This is a treasure trove of easy and cheap ways to get everything clean, without harming the environment. Some of these are cleaners my grandmother and aunts used and swore by. glad for the refresher

Very simple to read, understand and follow the easy recipes. I have already made (and used), the DIY Laundry detergent and love it. I have also used one of the recipes for a general cleaner with only 2 ingredients and great results. I'm sure I will continue to experiment with all of the recipes over the next several months, and hopefully, save a lot of money in the process. I am also hoping that by going "green" as much as I can, my family's allergies and other minor health issues will begin to resolve.

I love this book, as I've been making an effort to eliminate horrible chemicals from my life and my house. The drain cleaner is the best thing I've found for clogged drains, hands down. Everything else I've tried, floor cleaners, Windex substitutes, have all worked like a dream and they're all natural.

In my quest to go chemical free (I will never be fully chemical free) with my cleaners, this book is awesome! It provides recipes and variants for various types of cleaners from general purpose kitchen cleaners to antibacterial bathroom cleaners. What I love is these recipes result in something that smells fresh, doesn't assault my senses or choke me out of the room, and works even better than the synthetic and harmful chemicals we buy. Recommend to anyone looking to reduce their chemical load.

Has saved me a lot of money and everything is very easy to make!!! I love that I can just walk past the laundry and cleaning aisles at the grocery store

I have been obsessed with their website for months now. I know the book doesn't contain all of the latest updates on how to do certain things, but I am glad to have it on hand. I prefer having a

blueprint handy in case the Internet goes out. :) I now make my own laundry detergent, dishwasher detergent, and a few other items.

Over the past two years, I have been on a quest to eliminate as many chemicals from my home as possible. This book has so many "recipes" that really work & save tons of money to boot.
