I bought this for my daughter who is a songwriter. She has used tablature manuscript paper before, but she stated that she enjoyed this because of the guitar finger charts at the bottom. She stated "sometimes I the finger positions in my songs aren't a 'named' chord, they just sound good together. This paper allows me to quickly jot down what my finger placement was without having to draw my own finger charts."

Very affordable and contains a good deal of pages. I enjoy the formatting, and it's great to keep around so I can write down riffs. I would appreciate slightly more space between bars, however.

The only thing I'd like is if the staves/tabs were bigger. There are other versions out there with larger staves/tabs, but they limit how many staves/tabs per sheet. Still a good buy. That's just me being picky. Spiral bound would be good as well.

This is a great book to have on hand. I use it to tab out impromptu riffs during lessons and to write down special chord fingerings for students. I will be ordering more of these for sure. I just wish the pages were perforated. Still the rip out neatly.

Recently started taking guitar lessons. My teacher uses this tab book to go over lessons and write out song tabs for me to practice. No complaints here. The lines look like they might be a little tight, but I have no issues reading them.

this is for writing your ; penatonics , cords , hot licks , or writing you songs down for your bandmates. great for lessons as well.

There isn't much I can say about this product. It has everything you need in a tablature book, but nothing exciting or anything. It does its job and that's what matters.

My son writes music and absolutely loves this book. He is able to write guitar parts in different forms. Best composing book we've found.
