The Saltwater Wetland (Life In The Sea)

Synopsis

It is only natural for people to be fascinated by the sea. Life originated in the oceans, and more than one-half of the people on Earth reside within 50 miles of the sea. However, even though we have sent explorers to the moon and other regions of space, we still know little about the frontier that surrounds us. The engaging new "Life in the Sea" set provides young readers with current, accessible information about the sea and its creatures. This comprehensive resource on the ocean's inhabitants presents living things in their physical habitats, emphasizing the relationship between marine biology and marine ecology. Each volume focuses on one specific area of the marine world, discussing its physical characteristics, the living things found there, and the impact humans have on the area. The perfect companion to "Facts On File's Life On Earth" set (see facing page), this invaluable reference presents a well-rounded view of marine life.

Book Information

Series: Life in the Sea

Hardcover: 160 pages

Publisher: Chelsea House Publications (September 1, 2005)

Language: English

ISBN-10: 0816057028

ISBN-13: 978-0816057023

Product Dimensions: 9.5 x 7.5 x 0.6 inches

Shipping Weight: 12 ounces

Grade Level: 7 and up

Customer Reviews

Pam Walker and Elaine Wood have almost 40 years of science teaching experience between them. Their expertise comes from formal training in biology education and hands-on practice with students. They have worked with pupils of all ages and abilities and know which experiments work, which materials are easiest to obtain, and which problems teachers may encounter.
