Marine Animals Of Baja California: A Guide To The Common Fishes And Invertebrates

Synopsis

This second edition of "Marine Animals of Baja California" describes 150 species of fish, and 65 species of invertebrates that are commonly encountered in the shallow waters surrounding the Baja California Peninsula and Islas de Revillagigedo. The book can also be used to identify shallow water fishes along the coast of Central America and the Islas de Galapago. The photographs of live fishes and invertebrates were obtained on a series of expeditions along the outer peninsula coast, within the Sea of Cortez, the Islas de Revillagigedo (250 miles S.W. of Cabo San Lucas), and the Islas de Galapago.

Book Information

Paperback: 112 pages

Quick ship. Makes it easy so id what I ate. Or what wiggled off my line. We snorkel and that's the main use.

I didn't mean to say I don't like it, just that it could be better. I would rather have an updated version.
