Experiments In General Chemistry: Featuring MeasureNet (Brooks/Cole Laboratory Series For General Chemistry)

Synopsis

Innovative and self-directed, EXPERIMENTS IN GENERAL CHEMISTRY: FEATURING MEASURENET, 2nd Edition prepares students for the laboratory setting by asking them multi-component questions, building their knowledge from previous experiments, and incorporating the innovative MeasureNet network data collection system into the manual. MeasureNet improves the laboratory experience by requiring smaller amounts of chemicals for experiments--making the lab safer and more environmentally friendly--and greatly increasing precision through its electronic data collection, analysis, and reduction features.

Book Information

Series: Brooks/Cole Laboratory Series for General Chemistry

Paperback: 448 pages

Publisher: Brooks Cole; 2 edition (March 11, 2009)

Language: English

ISBN-10: 0495561797

ISBN-13: 978-0495561798

Product Dimensions: 10.8 x 8.4 x 0.8 inches

Shipping Weight: 2 pounds

Average Customer Review: 2.2 out of 5 stars 8 customer reviews

Best Sellers Rank: #273,522 in Books (See Top 100 in Books) #122 in [Books > Science & Math > Experiments, Instruments & Measurement > Experiments & Projects](#) #1017 in [Books > Science & Math > Chemistry > General & Reference](#) #1117 in [Books > Textbooks > Science & Mathematics > Chemistry](#)

Customer Reviews

Safety Rules. Common Laboratory Glassware and Equipment. 1. Densities of Some Liquids and Solids. 2. Specific Heat of Substances. 3. Chromatography. 4. Determination of the Percent by Mass of the Components in a Mixture by Thermal Gravimetric Analysis. 5. Self Directed-Thermal Insulating Materials. 6. Reaction Stoichiometry. 7. Types of Chemical Reactions. 8. Identifying Metal Ions and Inorganic Compounds by their Chemical Interactions. 9. Gravimetric Analysis of a Chloride, Sulfate, or Carbonate Compound. 10. Emission Analysis of Aqueous Solutions of Group IA and IIA Metal Salts. 11. Determination of Chromium (VI) Concentrations via Absorption Spectroscopy. 12. Determination of the Concentration of Acetic Acid in Vinegar. 13. Solubility, Polarity, Electrolytes, and Nonelectrolytes. 14. Self-Directed-Determination of the Cause of a

Fish-Kill in the Clark Fork of the Columbia River. 15. Self-Directed-Quality Control for the Athenium Baking Soda Company. 16. Gas Laws. 17. Colligative Properties. 18. Soaps and Detergents. 19. Heats of Chemical and Physical Processes. 20. Hess's Law. 21. Determination of the Heat of Neutralization of a Variety of Strong Acids and Bases. 22. Dystan Medical Supply Company-Cold Packs and Hot Packs. 23. Kinetics-Reaction Orders. 24. Chemical Equilibria. 25. Determining the Equilibrium Constant for a Reaction. 26. Determining K_a of an Acid by Titration and from pH. 27. pH and Buffer Solutions. 28. Self-Directed-Identifying an Unknown Weak Acid. 29. Quality Control for GlassEx Window Cleaner. 30. Determining the Iron Content in Cereal. 31. Analyzing the Chemical Content of Chromite. 32. Determining the Time Interval Between Doses of a Cardiac Drug. 33. What is in This Container?

Bobby Stanton received his Bachelor's and Master's Degrees from Tennessee Technological University and his doctorate from The University of Tennessee. He is an Academic Professional at the University of Georgia and serves as the Coordinator of General Chemistry Laboratories. He is involved in the development of Self-Directed (a form of guided inquiry) experiments designed for the MeasureNet Digital Data Acquisition System, and has authored or co-authored 15 publications in journals such as ANALYTICAL CHEMISTRY AND APPLIED SPECTROSCOPY. Currently a faculty member at Indiana University - Purdue University at Indianapolis (IUPUI), Lin Zhu has taught at University of Hawaii at Manoa, University of Hawaii at Hilo, and University of Georgia. When he served as Franklin Fellow at the University of Georgia, he was involved in the development of experiments designed for the MeasureNet Digital Data Acquisition System. He has authored or co-authored articles in journals such as JOURNAL OF PHYSICAL CHEMISTRY and MICROPOROUS AND MESOPOROUS MATERIALS. Lin Zhu received his Bachelor's Degree from Peking University in Beijing, China, and his Ph.D. from University of Hawaii at Manoa. Charles H. Atwood is a Professor of Chemistry at the University of Georgia, where he is Coordinator of Freshman Chemistry. His research includes new technologies for teaching and testing chemical phenomena, as well as emerging computer technologies to enhance teaching of freshman chemistry. He is the recipient of the University System of Georgia's Board of Regents 2009 Award for the Scholarship of Teaching and Learning. Dr. Atwood has authored several books and published articles in the Journal of Chemical Education, The Chemist, and Journal of Radioanalytical and Nuclear Chemistry. He received his Bachelor's Degree from Millsaps College and his Doctorate from Florida State University.

I bought this for my Gen Chem lab, supposedly 'new'. I was wrong apparently because for the first semester it was fine! But for this semester, I've discovered that ALL of the post lab, pre lab, and lab reports have been ripped out. I paid 153 dollars for a lab book that doesn't have labs in it! I should really be refunded, but the window of time to be refunded has expired, seeing as I discovered this discrepancy only 1 day before my next lab is due. I am livid. As I said, don't buy it, it's a scam. You can find free pdf's of it online.

Very unhappy with product. In order to get credit for the assignment the lab report must be written down on the lab paper. I was planning on copying the pages and turning it in that way and maybe reselling it afterwards, but the lab reports are almost all torn out rendering the book useless. I am upset I wasted this money on an item that does me little good.

I bought this for my Gen Chem lab and it came promptly. The book looked brand new, with all the pages intact, and I never had any problems with it in lab. It was exactly like the lab manuals that my classmates bought from the university bookstore. I guess I got lucky with my order, after looking at the other reviewer's comments. I would buy this book again, but fortunately, I'm done with this chemistry class!

This book is exactly as awesome Bobby Stanton. I had the pleasure of being in his class. He sucks. Then end.

I would have given this 5 stars, but a few pages were missing, which caught me off guard. Luckily, I found a copy online and printed off the few pages I was missing.

No where did it say the pre lab questions and other needed information wasn't in the book. Thanks for having me waste my money. I needed this book by TOMORROW MORNING for my lab and now I'm gonna fail it.

I was surprised when the description stated slight wear and tear on the outside and like new on the inside with few markings. I think there were few markings because all the labs were removed and all the questions were removed along with them. It's shame.

This lab manual is horrible. It is only sold at UGA so that the lab professor can profit off the

students. Half of the experiments don't work.
