Johns Hopkins Nursing Evidence Based Practice Model And Guidelines (Second Edition)

Synopsis

The birth place of Internal Medicine, Johns Hopkins University continues to be a leader in the health care profession. Johns Hopkins Nursing Evidence-Based Practice Models and Guidelines Second Edition has been revised and updated with new case studies and exemplars. Evidence-Based Practice Second Edition covers practical guidelines on the model with exemplars, a question and development tool, evidence rating scale, project management, appraisal forms, and evidence summary documents. This book helps nurses, not only understand the theory, but also put it into action. Evidence-Based Practice Second Edition is a hand book for nurses and a text book for students. The Evidence Based Practice Second Edition has expanded and improved tool and form including additional guidelines for individual appraisals and both research and non-researched-based evidence.

Customer Reviews

Sandra L. Dearholt, MS, RN Sandra Dearholt is currently the Assistant Director of Nursing for Neurosciences and Psychiatry at The Johns Hopkins Hospital, Baltimore, Maryland, USA. She has an extensive clinical background in critical care, nursing administration, and staff development. Dearholt has written a variety of articles on evidence-based practice and has spoken extensively on the topic. Her special areas of interest are the development of strategies for incorporating evidence into practice at the bedside, fostering professional practice standards, and service excellence

through patient-centered care. Dearholt is also a co-author of Johns Hopkins Nursing Evidence-Based Practice Model and Guidelines (2007). Deborah Dang, PhD, RN, NEA-BC Deborah Dang is the director of nursing, practice, education, and research at The Johns Hopkins Hospital, Baltimore, Maryland, USA, and holds a joint appointment with The Johns Hopkins University School of Nursing. For the past 10 years, she has guided the transformation of the nursing culture at The Johns Hopkins Hospital to one of practice based on evidence. She has consulted and presented regionally and nationally on the topic of evidence-based practice. She is an active health services researcher who studies structural and process factors in the nursing practice environment that impact patient outcomes, and was the recipient of the 2006 Academy Health interdisciplinary Research Group on Nursing issues New Investigator Award. She is committed to creating and sustaining practice environments that foster nurses roles in improving patient outcomes. Dang has served on statewide workgroups and has a longstanding interest in organizational change. She led major efforts at Hopkins, including a multiyear implementation of a hospital-wide redesign of the Patient Care Delivery Model, development and implementation of a nursing salaried compensation model, and creation of the ideal medication-use system to guide new building planning.

This program is a great asset when trying to engage nurses who are new to or unfamiliar with the EBP process. The book is an easy read: not too technical but has ample resources should you want to delve deeper into any concept.

I am using this for my capstone course and it has been very helpful and easy to read.

Needed this for a class. Easy to follow template for researching and implementing evidence based practice.

SCHOOL SEMESTERS ARE 16WEEKS RENTAL ONLY 8

This was not very useful in that it was not easy to navigate concurrently with my school lessons. I would have preferred to receive my money back.

Purchased this book as a requirement for school. Found it very dry and therefore difficult to follow

Great product! Excellent customer service. I would recommend this purchase.

This book was very informative. This textbook was required for my capstone course.
