Grade Level: 1 - 3

Customer Reviews

Kindergarten-Grade 3-A brief overview of "one of the chilliest places on Earth." The chapters on animals are organized by land, sea, and air, and the book culminates with a section on springtime in the Arctic. The information about each creature includes the term for its young, size at birth and full grown, food, and enemies. The polar bear, arctic fox, arctic hare, muskox, arctic wolf, ringed seal, walrus, beluga whale, ptarmigan, snowy owl, gyrfalcon, caribou, and arctic tern are all introduced. The book does not include a table of contents, index, or glossary, which makes it difficult to use for reports, but beginning readers will enjoy reading it in its entirety or browsing to identify specific animals. The open format includes a few short sentences per page and softly colored illustrations of the animals in their natural habitat. An appropriate purchase for those looking for easy-to-read animal titles or books on the far North.

She also writes activity books, teacher guides, and lesson plans, and provides academic support in the classroom.

Great information. Accurate and of an interest level for pre-k they eighth grade. Fabulous photos! Used in homeschool unit for Arctic Animals.

Fantastic book for my second grader who doesn't really like to read. Clear print, interesting facts, engaging illustrations. Challenging vocabulary words were followed by pronunciation aids, which my son really liked once he understood how to use them. Don't hesitate to buy this book.

Love this book. I used this text for beginning research with my second graders. Lots of interesting information on animals in the sea, on the land, and in the air in the Arctic.

Kids in the classroom loved it.

Great book. High interest while low reading level. Thank-you for the non-fiction subject matter!

As expected

As a reading specialist, I am always looking for good non-fiction books at an age appropriate level. I thought this book was great for 2nd and 3rd grade students.

Great book- very informative
