Customer Reviews

Truly a must have reference if you or your kids are into dinosaurs. Each page is full of science! Most used book by my family!

This book is CRAMMED with information! I especially like that at the bottom of the page it has a picture that has an outline of a human standing next to an outline of the dinosaur being described to show size. It really helps hammer home the sizes of the dinosaurs.

Great illustrations and many interesting facts.

Remember this book from childhood. So happy to have it in my collection now. Would recommend to anyone wanting to learn more of dinosaurs.

My son (13) and I went on a dinosaur dig this last summer. I asked the a professor and some of the regulars on the dig what they would recommend as a book for my son. They all agreed that this was one of the best. It also helped identifying some of the bones we were finding! I really hope they

reprint and update this book with the new information that is available, it is a real treasure.

I received this book in good time and was pleased with the book, it has pictures, and a slew of very interesting informative information, Good Book!!!!

No problems with this purchase. Happy with the results.

Gift for 12yr old grandson. Condition excellent.
